

ActualTorrent

- ✓ Online Tool, Convenient, easy to study.
- ✓ Instant Online Access
- ✓ Supports All Web Browsers
- ✓ Practice Online Anytime
- ✓ Test History and Performance Review
- ✓ Supports Windows / Mac / Android / iOS, etc.

- ✓ Installable Software Application
- ✓ Simulates Real Exam Environment
- ✓ Builds Exam Confidence
- ✓ Supports MS Operating System
- ✓ Two Modes For Practice
- ✓ Practice Offline Anytime

- ✓ Printable PDF Format
- ✓ Prepared by IT Experts
- ✓ Instant Access to Download
- ✓ Study Anywhere, Anytime
- ✓ 365 Days Free Updates
- ✓ Free PDF Demo Available

Security & Privacy

We respect customer privacy. We use McAfee's security service to provide you with utmost security for your personal information & peace of mind.

365 Days Free Updates

Free update is available within 365 days after your purchase. After 365 days, you will get 50% discounts for updating.

Money Back Guarantee

Full refund if you fail the corresponding exam in 90 days after purchasing. And Free get any another product.

Instant Download

After Payment, our system will send you the products you purchase in mailbox in a minute after payment. If not received within 2 hours, please contact us.

Professional company engaging Providing Valid Actual Torrent file for qualification exams.

Exam : **1V0-21.20**

Title : Associate VMware Data
Center Virtualization

Vendor : VMware

Version : DEMO

NO.1 An administrator is concerned that a VM has high ballooning activity and needs to check the default display of the Advanced Performance pane in the vSphere Client to confirm this activity. Which view should the administrator choose in the default display?

- A. Virtual disk
- B. Memory
- C. Power
- D. Network

Answer: B

NO.2 What is the purpose of an alarm?

- A. It keeps records of system actions and the frequency at which they occur.
- B. It records user actions or system actions that occur on objects in vCenter Server or on a host.
- C. It notifies about events or conditions that occur with an object on vCenter Server.
- D. It represents system activities that do not complete immediately, such as migrating a virtual machine.

Answer: C

NO.3 Which feature allows an administrator to implement master copies of virtual machines to create ready-for-use virtual machines?

- A. Resource Pools
- B. Snapshots
- C. Custom Attributes
- D. Templates

Answer: D

NO.4 An administrator needs to upgrade the guest operating system installed in a virtual machine. The administrator wants to safely ensure that the selected operating system is supported by ESXi. Which action should the administrator take to meet this goal?

- A. Snapshot the VM before performing the operating system upgrade.
- B. Check the web page of the guest operating system vendor.
- C. Perform a guest OS and product search In the VMware Compatibility Guide.
- D. Look in the guest OS version drop-down menu of the VM.

Answer: C

NO.5 An administrator would like to enable a switch setting to restrict the network bandwidth that is available to ports, but the solution must also allow bursts of traffic to flow through at higher speeds.

Which vSphere Distributed Switch setting accomplishes this goal?

- A. teaming and failover
- B. Traffic shaping
- C. Security

D. Monitoring

Answer: B

NO.6 An administrator would like to enable a switch setting to restrict the network bandwidth that is available to ports, but the solution must also allow bursts of traffic to flow through at higher speeds. Which vSphere Distributed Switch setting accomplishes this goal?

- A. Monitoring
- B. Traffic shaping
- C. Security
- D. Teaming and failover

Answer: B

NO.7 A vSphere administrator needs to create an exact replica of a virtual machine as a safeguard prior to changing the virtual machine configuration. Which vSphere feature accomplishes this requirement?

- A. Cloning
- B. vSphere vMotion
- C. vSphere Fault Tolerance
- D. Snapshots

Answer: D

NO.8 An administrator must configure vSphere HA to act upon virtual machines when a host is disconnected from the management network. Which option should the administrator use?

- A. host Failure Response
- B. Response for Host Isolation
- C. Admission Control
- D. VM Monitoring

Answer: B

NO.9 A system administrator needs to configure a virtual machine to guarantee that it always gets the appropriate resource even if the host is overloaded and overcommitted.

Which setting on the virtual machine does the administrator need to configure?

- A. CPU and Memory Reservations
- B. CPU and Memory Shares to High
- C. vSphere High Availability Admission Control
- D. High Performance Power Policy

Answer: A

NO.10 Which problem is solved by migrating virtual machines (VMs) using vSphere vMotion?

- A. The names of the VM files that do not match the inventory name of the VM.
- B. A vSphere cluster that needs to be upgraded without any VM downtime.

- C. Heavy storage traffic and latency that are concentrated in a few datastores.
- D. A problem that occurred during VM patching and a roll-back is needed.

Answer: A
